

Heavy volume of steamship traffic

Bookings and inquiries received by the Cunard Line since January 3 this year indicate a heavy volume of steamship traffic for both its transatlantic and cruise service in 1959.

The 119-year-old Cunard Line opens its St. Lawrence route this year with the Cathartica sailing from Montreal April 14 to Liverpool. From there will follow November the Centuria and three regular vessels, the Scotia, Titanic and Sylvestra together will make 45 sailings from Montreal to Quebec to U.K. and Continental ports.

This season the four 8,500-ton liners will make a brief call at Quebec after leaving Montreal to deliver passengers wishing to ship cargo at that port. Regular service will be maintained to Liverpool via New York, and regular service with four calls at London (Amthor) via all Le Havre.

Regular sailings are scheduled from Montreal to Glasgow during 1959 season by the Dominion Line passenger-cargo liners Laurier and Lamorne which will carry 50 first class passengers.

During the winter the four Canadian service Canadiana maintain regular service from New York to call at Halifax, St. John's and the regular and westbound.

New cruising was to be 10,000-Matruiana which sails to the West Indies and the Central West Indies and the Central West Indies on a 10-day voyage return the world. Following this return the Canada sails from New York May 15 on a 20-day voyage to the Mediterranean.

Winners named in fire contest

Five Manitoba communities have won recognition for their aware, prompt and observant fire prevention work. H. E. Purvis, provincial fire commissioner, said the contest was sponsored by the Fire Prevention and Clean-up Campaign Committee of the National Fire Protection Association (International). It was designed to stimulate universal fire safety consciousness and to encourage communities to use Fire Prevention Week as a "springboard" for year-round fire prevention programs at the community level. Winners are the Manitoba winners: Chas. B.-Clites with a population between 25,000 and 50,000—Brandon. Chas. C.—Clites and towns between 10,000 and 24,000—Trans coast first. Town between 5,000 and 4,000—Neepawa. Chas. E.—Clites under 2,500—Gilbert Plains.

JUNIOR MUNCHAUSEN

When most parents discover that their child lies, they are shocked at the new ploy. They realize that the youngster is getting quite good at this phase. He may tell untruths to his mother, but in the end, where his imagination is stronger than reality, and eagerness to please, he is given to understand that his story is regarded as either a lie or a truth. He may tell the truth, but he is not to be trusted. He is frustrated by his family. He lies to avoid punishment, perhaps his parents have been too severe.

Easy and thrifty

Easy and thrifty! Keep baby cozy in this smart set, to stockpile and openwork outfit. Easy-cut set takes 2 ounces of Spig jacketing. Yarns. Jacket all in one pattern 1157. Directions on spig, jacket — jiffy in infants to adult sizes.

Send thirty-five cents (coins) for this pattern (seams cannot be accepted).
Humboldt Art Studio, Department F.F.L., 600 First Street, W. Toronto.

THE THREE ADVENTUROUS NEWSMEN who spent the night on the frozen wasteland with soldiers in training are, from left, Gordon Jack, Melville Adair, Bill Beare, Chic Winthrop, and Doug King, Saskatoon Star-Phoenix.

Stories on Canada's northland

During the next few weeks you will be reading stories about activities of the Canadian Joint Services Station, Fort Churchill, and the nearby town of Churchill. At the station are read, little or no thought will be given to the writer's name. Gordon Jack is the publisher of the Melville Adair at Fort Churchill he was representing the Army's "ready" means news. He is the publisher of the Melville Adair at Fort Churchill he was representing the Army's "ready" means news. He is the publisher of the Melville Adair at Fort Churchill he was representing the Army's "ready" means news.

For Gordon it was a partial return to Army life, having been in the Army in World War Two and a little office for many years afterwards. At Churchill he was to uniform, but all other matters were Army environmental (clothing such as inner and outer coats, boots, socks, gloves, and regular winter boots).

One of the highlights of his stay will be reading about the only hospital in the north of the continent, the Indian and white people as his normal day-to-day patients. The hospital is operated by the Royal Canadian Army Medical Corps. Another interesting fact, we didn't tell Gordon will be that we on his way north, is that Fort Churchill is colder in winter than in January than Alert. Thus, Arctic Day and even the North Pole.

During his time on the tundra, Gordon's buddy was Doug King of the "ready" means news. He is the publisher of the Melville Adair at Fort Churchill he was representing the Army's "ready" means news. He is the publisher of the Melville Adair at Fort Churchill he was representing the Army's "ready" means news.

JUST RAMBLING

The right is a fair chance in the life of a child. It has been accepted in our democratic society.

A fair chance implies an opportunity for all children to grow up in happy and contentment, to be educated to the full extent of their capabilities, to be eventually in addition to make their greatest possible contribution to this nation.

Unfortunately approximately three of every ten Canadian children born in this country have no decent chance of growing up as the mentally retarded children.

Mentally retarded is not a disease but a condition. In fact, it is a deficiency may strike any child at any time, and the greatest and the talented or the humblest of us may be born as a mental retardee.

Even today, a retardee is called "low worker," a retardee or perhaps a relative whose tragic nature is a retarded child.

For centuries it was assumed that nothing could be done for the retarded child. Sometimes courageously, often out of pity, parents accepted their role as a life sentence to misery and shame. The unfortunate child, regarded as hopeless and worthless, was usually hidden away to live out his life completely isolated and lonely.

Even today there is no accurate check on the many children who are born because of fear and ignorance of the help available.

Now it has been generally accepted that mentally retarded children can be helped and that they can contribute to society.

And so it is hoped that, in line with the progressive steps of our time, the modern schools established to help the retarded child, to give him the facilities for the education of the mind and the body, to give him the opportunity to live a life of freedom and dignity without further delay.

The Northern Light, Bala, N.S.

50 Projects okayed under province's plan

Right more winter works projects have been approved by the provincial-municipal winter works committee.

Four of the projects are under the provincial plan. Approval by the committee was final and the projects now are to be carried out by the municipalities.

There have been 50 projects approved under the provincial plan. They have a total value of \$350,000.

The provincial scheme to date has provided work for 412 men or women and 1,500 man-days.

The federal government has approved with a total value of \$434,470.00. The total payroll cost is \$1,297,640.00. Of this the federal government will pay \$644,520.00. The province will pay \$141,068.00.

The federal projects will provide 1,228 man-days of work involving 67 men or women and 1,500 man-days.

The total number of man-days of work provided by both federal and provincial projects is 1,500 man-days.

Interest on the public debt incurred by the federal government could be reduced by 10 per cent.

The Canadian Mental Health Association is a national organization for the support of psychiatric research.

Canadian Weekly Free Press

Designed Exclusively to Serve the Heart

Montreal's Institute of Cardiology

The Montreal Institute of Cardiology houses under one roof all of the trained personnel required to diagnose and treat the wide range of heart diseases together with the most modern equipment obtainable. A photographic department records delicate heart operations in their entirety, still photographs of diseased organs serve as a visual record for the continuous research which is a vital part of the work done at the institute.

The reputation of the Montreal Institute, under its Director, Dr. Paul David, has spread throughout the medical world. Doctors and interns come to the centre from China, Roumania, Turkey, Hungary, Switzerland and Italy. Team of specialists above listens simultaneously to beat of patient's heart.

National Film Board of Canada Photos by Chris Lund.

In Canada, one person out of two dies of a heart disease after the age of 40; doctors note with concern that heart ailments are occurring with increasing frequency among younger people too. Above, nurse checks patient's blood pressure as he treadle walking machine.

Thanks to modern surgery, many who a few years ago were doomed to early death or a life of semi-invalidism, now undergo treatment with bright hope for a full recovery. The little girl above is one of hundreds treated at Montreal's Institute of Cardiology during the past year.

A dramatic stop-heart operation is performed at the Montreal centre while the vital functions of heart and lungs are taken over by an intricate network of artificial tubes, giving the surgeon precious minutes to repair the heart's anatomy. Stop-heart or open-heart operations are also being performed at other Canadian cities: Toronto, London, Edmonton and Vancouver. The Montreal institute is the only one devoted exclusively to diseases of the heart.

New trophy for marksmanship competition donated to Army

A new trophy for marksmanship competition by the 45 infantry regiments of the Regular Army has been donated to the army by the late Brigadier A. Hamilton Gault, DSO, CD, who died last November.

Founder of the famed Princess Patricia's Canadian Light Infantry and one of Canada's most notable soldiers, Brig. Gault was always an enthusiastic advocate of rifle marksmanship. He considered that a unit is "only as good as its marksmanship."

The trophy, featuring a silver figure of a Canadian soldier firing the PM rifle, is believed to be the first trophy to portray the new weapon.

The figure is mounted on a base of Kentucky walnut, the wood used in the manufacture of the PM rifle. The lower portion is bordered with design in maple leaves on which will be inscribed the names of winning units.

The upper portion bears a plate inscribed with the donor's name and the leg badge of the 45 infantry regiments, worked in silver.

To be formally presented to the Canadian Army later this year by Mrs. A. Hamilton Gault, the trophy will be offered annually to the infantry battalion competing on top in a rifle shooting competition involving all its members and not merely a few crack units.

First unit to win the trophy, and whose name will be inscribed is the 1st Battalion, The Black Watch (Royal Highland Regiment) of Canada, who earned this honour in the first competition, held in 1955.

Conditions of the award were:

New Arts Building contract awarded

Contract for construction of the auditorium block and office wing of the new Arts Building, University of Saskatchewan, Saskatoon, has been awarded to Birt Construction Company Limited, Ltd. C. D. Willis, minister of public works, announced.

The contract was for \$1,749,000, and the new building is expected to be completed by 1963. Work on the building is scheduled to get under way immediately. Architects are Stone & Moffatt of Toronto.

Tenders for construction of a three-storey classroom wing for the building were called in the fall of 1958, with the contract being awarded to W. C. Willis Construction Company of Saskatoon. The amount of this contract was for \$388,970. Construction cost of the complete building will be \$2,837,970.

Mr. Willis said that the building will be worthy of the "Grecian" construction common on the campus but will have its own distinctive design in keeping with its surroundings.

Honored by elevator company for 50 year's service

Frank Duff of Davidson was honored by the National Elevator Co. Ltd. at a testimonial dinner recently in the Qu'Appelle Suite of Hotel Saskatchewan. Mr. Duff has served 50 years with the company, and during that time handled some million barrels of grain. Dinner was served to 24 guests, and a presentation of a silver inscribed tray made to Mr. Duff by George Hedderley, Jr., of Winnipeg, vice-president of the company. C. W. Minus, Regina branch manager, was in charge of the arrangements for the event.

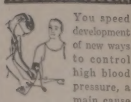

Among those attending from Davidson were Mrs. Duff, Mr. and Mrs. M. Gower, Mr. and Mrs. J. L. Leger, Mr. and Mrs. C. M. Jones, Mrs. Penock, and Mr. and Mrs. M. M. Jones. Clerk, The Leader, Davidson, Sask.

CNR appointments

C. E. Ellis, an engineering graduate of the University of Saskatchewan, has been appointed transportation engineer for Canadian National Railways western region, with headquarters at Prince George, B.C.

P. R. Bannister, formerly of Winnipeg and Calgary, has been appointed district freight agent for Canadian National Railways, with headquarters at Prince George, B.C.

to regain it where it seemed to be slipping away from us. It may be that Canadian industry will get a modicum of orders for supplying the United States armed forces. But not too much reliance should be placed on this. The Yanks are not ready shavers.

Mr. Peakes and others have endeavored to sell the Arrow plane to the United States. The cost of this sales effort would be as trifling as the things go but the time might just as well have been saved. The United States will never under any circumstances allow any significant imported device. Their pride, justifiably or not, will insist that they build everything for themselves.

Never to be forgotten, however, is the fact that the United States needs Al. And particularly does it need Canada and Gt. Britain. Even the United States cannot go to war in all respects. Although the attitude of Americans in general is probably epitomized by a statement made under the name of the young Jim Wadsworth, then United States Senator from New York (later a member of the House of Representatives). Young Jim was young mainly to distinguish him from his distinguished father. He said under the name of the United States Senator in world affairs would be that it would march down the centre of the road, looking neither to the right nor to the left, and trying to interfere with its march.

HAZEL ROBINSON MEMORIAL SCHOLARSHIP 1959

The Hazel Robinson Memorial Scholarship to the Banff School of Fine Arts Summer Session will be awarded this year according to the following conditions:-

- 1 The Scholarship for 1959 is open to any present Senior High School student in Alberta, or any person who has attended Senior High School in Alberta in the past five years and is under 25 years of age.
- 2 The Scholarship is to be awarded on the basis of:
 - (a) A single piece of original writing of approximately 3,000 words, in the form of (1) An essay or article (2) A short story (3) A drama for stage, radio, or television; or (b) Selections of poetry, totaling approximately 100 lines.
- 3 There shall be no restrictions as to the topics of the piece of writing or poetry submitted.
- 4 Application of submissions shall be by a committee designated by members of the scholarship committee with one representative of the Department of Extension, University of Alberta.
- 5 The decisions of the judges shall be final.
- 6 No submissions to the competition can be returned to the authors.
- 7 The closing date for receipt of 1959 is April 30.
- 8 The amount of the scholarship provided by the Hazel Robinson Memorial Committee shall be One Hundred and Fifty Dollars, deposited to the account of the winner at the Banff School of Fine Arts, applied to fees and living expenses while the recipient is taking a written course offered by the school.
- 9 If the entries in any year do not, in the opinion of the judges, reach a reasonably high level, the judges reserve the right to withhold the award.
- 10 Entries should be submitted to "Hazel Robinson Memorial Scholarship Committee" Department of Extension, University of Alberta, Edmonton.

Local & District

Emile Nagy, of Calgary, is spending a few days at the home of his mother, Mrs. A. Nagy, of Delia.

Ron Eberle, formerly employed by the Bank of Commerce, has for the summer months, leaving his job at the farm.

Mrs. Bill Howe, of Delia, spent last week end in Kinderley visiting relations.

Mr. and Mrs. Gordon Clenden, of Saskatchewan, were visitors at the home of Mr. and Mrs. R. G. Richter on Monday.

Stan Larson and Roy Oakes took a truck load of Cattle to the south, and arrived back Monday eve. Stan again left Tuesday morning with a load of Cattle for Edmonton, bringing back a load of feed.

Next Tuesday, March 17, is St. Patrick's Day, when all good Irishmen drink their shamrock.

The weather during the past week generally has been mild and sunny. At this writing (Thursday) the temperature is 40 above.

See the new Many-Perguson No. 36 wild level die Harrow, now on display at Messrs. Larson and Isaac's garage.

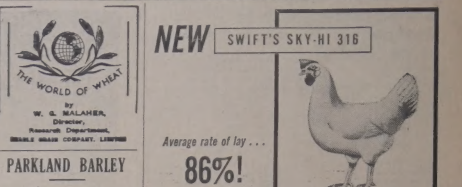

Miss Irene Van Riper, Miss Margaret Rose Battle, and Mr. Patterson Battle, all of Calgary, were week end visitors with their respective parents of Delia.

Mr. and Mrs. Dick Lavers, of Calgary, were visiting with relations in the Craigmile district last week end.

Rev. Ralph L. Lantierman, of Red Deer, Alta., will be the speaker at Special services at Craigmile Church of the Nazarene, March 16th, at 2nd. At 4:00 p.m. and 8:00 p.m. on Sundays, and at 8:00 p.m. each night during the week, except on Sunday.

On Wednesday, Rev. Howard Gratz, returned missionary from Peru, will share in the service and tell of his work as a Missionary Evangelist in the villages of Peru.

NEW SWIFT'S SKY-HI 316

Average rate of lay... **86%!**

Swift's new Sky-Hi 316 was developed especially for the quality user who depends upon his living room for income. It combines high production with good design for the "average" efficiency. And, unlike many high producers, Swift's new Sky-Hi 316 maintains an extremely high level of without sacrificing gas mileage.

How is a completely new strain-on Leghorn that excels in all characteristics of economic efficiency. In extensive tests of this and other strain-types, the Sky-Hi 316 proved superior. It had the highest egg production, earliest maturity, and greatest viability of all layers tested. During the 14-month period, the Sky-Hi 316 achieved a production of 281 eggs... an average rate of lay of 86%! And the egg weight was completely high.

Order this top money-maker for your flock... the Sky-Hi 316 is ideal for either floor or cage. Sky-Hi is a trademark of Swift Canadian Co., Limited. For the Sky-Hi 316 and other fine Swift chicks, contact:

PARKLAND BARLEY

A Commentary

It would have been surprising indeed, if the new Parkland barley and maling industries, respecting Parkland barley, had failed to substantiate the scientific merit of this variety, from the maling standpoint, at each stage in its development, prior to licensing in 1956, as well as since that time.

Parkland, developed as a Canadian maling barley, co-ordinated the efforts of plant breeders and seedsmen at all stages of work. Aside from its proven superiority in the field over other Montcalm or O.A.C. 21 on account of its higher yield, higher malting weight, stronger straw and resistance to stem rust, this variety had strong evidence of superior maling quality, including a higher malt extract.

Industrial users or processors of grain such as malsters and brewers, have quite understandably, to be cautious about making changes in their raw products for fear of influencing the quality of the finished product which must satisfy the exacting demands. Nonetheless, the fact that the maling and brewing industries have now accepted Parkland, once again, demonstrates that we can put a great deal of confidence in the work of our Canadian scientists.

In future, the introduction of a new variety should be greatly facilitated since new pilot equipment for both maling and brewing is being added to provide intermediate tests between the preliminary maling stage and actual commercial usage. These pilot tests will furnish industry with additional information on processing.

Now that the situation has been clarified with respect to maling usage, this variety, because it is also a first class feed barley, is likely to become predominant over fairly large areas of both Manitoba and Saskatchewan, where it is already being grown fairly extensively.

Canada is large pulp exporter
